DETAILED ACTION

Request For Continued Examination

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application (10/554,231) has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 8/26/09 has been entered.

Response to Amendment

2. Applicant's amendment filed on 3/5/09 has been entered.

Claim 36 and 37 is new claim.

Claims 30 and 34 are canceled.

Claims 1- 29, 31- 33, 35 - 37 are pending in the application.

Response to Arguments

3. Applicant's arguments filed on 3/5/09 have been fully considered and persuasive (see page 14 - 16, of the remarks filed on 3/5/09). The rejection under 102(e) Petterson et al., (US. 6,667,695) is withdrawn and all the pending claims 1- 29, 31- 33, 35 - 37 are now allowed.

Information Disclosure Statement

4. The information disclosure statement (IDS) submitted on 8/26/09 has been considered by the examiner.

Reasons For Allowance

5. The following is an examiner's statement of reasons for allowance:

Claims 1- 29, 31- 33, 35 - 37 are allowed and Renumbered as 1-35.

Applicant's arguments see page 14 -16, of the remarks filed on 3/5/09. The prior art of record Petterson et al., (US. 6,667,695) identifying dots in an image and fitting a raster to the dots, and effective correct decoding of a position code that codes a very large number of positions also reference discloses the use of matrices. Petterson fails to teach "retrieving at least one reference position, the at least one reference position corresponding to a preceding position extracted from a prior image of the position-coding pattern" and "extracting said sequence of positions by matching information obtained from each of said images with a corresponding pattern reference area, which represents a known subset of the position-coding pattern with a given spatial relation to said reference position" (as recited in claim 1 and 32); "generating a probability matrix, said probability matrix containing one matrix element for each mark in said partial area, each matrix element being adapted to store either a value which represents a most probable estimated value of its mark, or a value which represents that no value has been estimated for its mark" ; "probability matrix" where each matrix element is "adapted to store either a value which represents a most probable estimated value of its mark, or a value which represents that no value has been estimated for its mark," much less "matching said probability matrix with information about how the position-coding pattern is composed in a pattern reference area" that is "larger than"

Art Unit: 2624

and "including" a "partial area," and that "defines a plurality of positions" ;
"selecting, as the position to be determined, the one of the positions defined
by said pattern reference area for which the matching step indicates
correspondence between said probability matrix and said one of the positions
defined by the pattern reference area" (as recited in claim 27 and 33), as
commonly included in each of the independent claim 1, 27, 32 and 33 , the
prior art of record fails to teach either singularly or in combination, fails to
anticipate or render the above limitations obvious.

6. Any comments considered necessary by applicant must be submitted on
later than the payment of the issue fee and to avoid processing delays should
preferably accompany the issue fee. Such submissions should be clearly labeled,
comments on statement of reasons for allowance.
